How do I hook up my various devices to the Blue Stream Fiber system?

Installation & Setup · https://www.bluestreamfiber.com/support/how-do-i-hook-up-my-various-devices-to-the-blue-stream-fiber-system/

After completing your installation, which will take 3 to 4 hours, the Blue Stream Fiber technician will assist you in connecting your various devices to the new WiFi system using the Same SSID and password you were previously using to allow your devices to automatically migrate. To ensure none of your WiFi-enabled devices get missed during installation, be sure to have a list of those devices ready. Some examples of devices are computers, TVs, phones, tablets, and ancillary equipment like HVAC thermostats, doorbells, refrigerators, washing machines, security cameras, door locks, monitors, Echo and Alexa devices, pool pumps, pool water heaters, etc.
