What do I need to provide Blue Stream Fiber in order to port over my existing phone number?

General Phone FAQs · https://www.bluestreamfiber.com/support/what-do-i-need-to-provide-blue-stream-fiber-in-order-to-port-over-my-existing-phone-number/

In order to process your phone number porting request, Blue Stream Fiber will need the active phone number you are looking to port, your account number with your previous provider, a recent bill, and/or the pin number you have on file with them. If the account information on file with your previous provider is different than the account information on file with us (such as contact name or address), please let us know.

Failure in providing us with this information will result in a rejected port. As always, please DO NOT cancel your phone service with your previous phone provider until your Blue Stream Fiber phone service is successfully installed.
