LET'S GET STARTED

The very first step in watching TV is of course, turning it on! To turn on your TV remote, simply press the **ON** button, as shown, here!

Your remote should have been paired to your Set-Top box and TV during your installation, and you should now be able to use your voice-remote to turn on and off as well as to control the volume! In the coming pages you will learn more about all of the other buttons on your remote and the incredible features they are connected to!

HELPFUL TIP

If the screen is black, says “no signal” or “no input”, no need to panic. It may be because you are on the wrong input source.

Pressing the Input button on your remote, right under the power button, will change your input source and can cause you to get a blank screen or a “no signal” message. Simply make sure your input source is set to the correct HDMI input. To change your input source, press the Input button on the top left of your remote (under the Power button) and then pause to see if the TV picture has come back. Repeat as needed until your picture comes back or you have exhausted all input source options.

If your remote is not responding and won't work your TV volume or power, your remote may need to be re-paired. See instructions below on how to re-pair your remote.

TO RE-PAIR, simply press the **TIVO** button and the **BACK** buttons simultaneously until the activity light illuminates. Release the buttons; the activity light will flash slowly, and then flash quickly five times. Your remote should now work as it is supported to and will allow you to turn your TV on and off as well as explore all of the other features available.

STARTING TO WATCH TV

To help you get comfortable with your new video platform, we are going to walk through your Home Screen, the Menu, On-Screen Icons Guide and Mini Guide.

MEET YOUR HOME SCREEN!

The Home screen is the starting point for just about everything you may do on your Set-Top box. In fact, most times when you turn on the TV, you will start on the Home screen. From the Home screen, you can easily do things like watch live TV, go to the Guide, find your favorite streaming apps like Netflix or Hulu, and watch Video OnDemand. You can even get personalized recommendations of shows and movies you might like.

To get to the Home Screen from anywhere, just press the **TIVO** button on your remote.

This is what your Home screen looks like.

GETTING TO KNOW THE HOME SCREEN MENU

WATCH TV, MY SHOWS AND WHAT TO WATCH

The Home screen menu showcases your most commonly used functions. You can even access streaming apps like Netflix and Amazon Prime Video. You will learn more about these features in the coming pages.

- **WatchTV** starts playing live TV from channel you were last watching.
- **My Shows** brings you to all of your recordings. It also takes you to any OnePass you have set up (A OnePass is a handy playlist of all recordings, streaming videos and On Demand shows).

HELPFUL TIP

You will love the OnePass feature. Have a favorite TV show? If you set a OnePass, it will record all upcoming episodes and will also show you where you can catch up on past episodes on streaming services like Netflix & Hulu as well as On Demand.

What to Watch

Here you can easily browse shows that are available to watch now. Shows may be available on live TV, streaming apps like Vudu or Netflix, and Video On Demand. To find these options, look at the Menu bar as shown below. You can scroll left or right by pushing the left and right arrows in the middle of your remote!

FREQUENTLY ASKED QUESTIONS

Where can I find my recorded shows? All of your recorded shows are found in My Shows.

Can I record an entire series? Yes! Just set up a OnePass. A OnePass gathers every available episode of a series (whether streaming, broadcast TV, or on demand), every game or match from a specific team, or every sporting event in a league and adds them right to My Shows to watch instantly.

How many shows can I record at once? As many as you like!

How much storage space do I have for recordings? This depends on your service plan.

What happens when I run out of storage space? If you set up a recording when your storage space is almost full, you'll receive a message on your Set-Top box. At that point, you can upgrade to a plan with more storage, or you can delete some of your recordings to free some space. When you reach your storage limit, your Set-Top box will begin deleting your oldest recordings to make space for new ones.

Can I rewind live TV? Yes.

Can I pause a show in one room and resume watching in another? Yes. Your Set-Top box will remember where you left off.

How can I make sure my kids don't watch something they shouldn't? Parental Controls help you make sure your family has access to only those shows you want them to watch. When you turn Parental Controls on, you'll set a PIN that will be required to watch shows exceeding the limits you set. From the Home screen, Menu > Settings > Parental Controls. See Parental Controls.

I missed the beginning of my favorite live show. What should I do? Try using the Start Over feature. On many shows, when you turn to a show that is currently airing, you'll see the Start Over/Catch Up icon and an on-screen tip telling you to press and hold OK/SELECT to start the show from the beginning.

My remote control isn't working. The remote is set up and paired to your Set-Top box during installation. If your remote stops working, try replacing the batteries. If that doesn't solve the problem, try re-pairing the remote with the Set-Top box by pressing and holding the TiVo button and BACK buttons simultaneously until the activity light illuminates. Release the buttons; the activity light will flash slowly, then flash quickly five times.

Do I need a Google account to use the Set-Top box? No, but it is highly recommended. With a Google account, you'll be able to use Google Play, Google Music, Google Games, and Google Assistant right on your Set-Top box.
