

Get the Support You Need When You Need it!

Residential Tech Support Plans

Our Tech Support Plans are a low-cost alternative to ensure you get the most advanced equipment and/or technical support.

For example: our **Premium Support Plan**, provides an additional WiFi “pod” that connects with your Blue Stream provided router (GigaCenter) to expand the WiFi coverage in your home. This “mesh” WiFi system helps ensure your mobile devices receive maximum bandwidth when you move from place to place, enhances the performance of smart home devices and helps to eliminate interference in areas with low or no WiFi penetration. Additionally, the Premium Support plan has both remote and call-out support included

Why Do You Need a Tech Support Plan?

As today’s technology continues to advance, there is an increased need for you to have the best, most professional tech support possible for your internet, WiFi and voice services with Blue Stream Fiber. We’ve recently updated our plans, so contact us today to choose the solution that best meets your tech support needs.

Add one of our tech support plans to your Blue Stream Fiber Internet service, today!
