

Blue Stream Fiber TV App

At Blue Stream, we are committed to providing you with the best entertainment experience possible, and we want to ensure that you can make the most of our services both at home and on the go.

With the Blue Stream Fiber TV App, you can enjoy your favorite channels and recordings on the go. But keep in mind that out-of-home access depends on content providers' policies. Some channels are directly accessible via the app, while others may have restrictions set by programmers. Here's a quick overview of what you can expect:

Direct App Access:

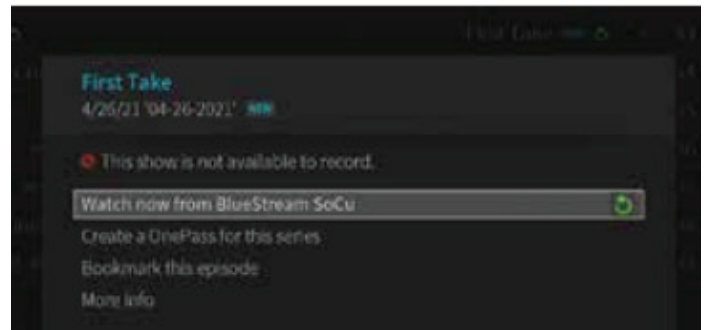

Some content is available to watch out of home directly through the Blue Stream Fiber TV App. For these channels, once you select them on the guide, the content will begin playing normally as it would when you are watching TV on your home network.

Recording on Home Network:

Certain content may not be available to watch out of home unless it has been previously recorded on your home network. Often this includes local channels exclusive to your community. A great way to be able to watch this content when out of home is simply by utilizing the recording feature. Once your content is recorded on a device connected to your home network, you can access the recordings when out of home!

Start Over and Catch Up Feature:

Take advantage of the start-over and catch-up features to access specific content even when you're away from home. When searching through the guide, you'll notice some content has a green arrow next to the program title. This means the Start Over and Catch Up feature is available and you should be able to watch the content when in home or out of home. This is because the content is no longer live and therefore available via On Demand.

We understand that your viewing preferences may vary, and we want to provide you with as much flexibility as possible. For a full breakdown of all channels available and how to access them, please [SEE HERE](#).

Thank you for choosing Blue Stream as your entertainment provider.
We appreciate your continued trust and look forward to enhancing your TV viewing experience.
